LINETRAXX® VME421H
Multi-functional monitoring relay for undervoltage, overvoltage and frequency monitoring in AC/DC systems without separate supply voltage
Device features

- Monitoring undervoltage, overvoltage and frequency of AC/DC systems of 9.6...150 V (VME421H-D-1), 70...300 V (VME421H-D-2)
- Without external supply voltage
- Integrated energy backup
- Various monitoring functions selectable < U, > U, < f, > f
- Start-up delay, response delay, delay on release
- Adjustable switching hysteresis
- r.m.s. value measurement (AC+DC)
- Digital measured value display via multi-functional LC display
- Preset function (automatic setting of basic parameters)
- LEDs: Power On, Alarm 1, Alarm 2
- Measured value memory for operating value
- Continuous self monitoring
- Internal test/reset button
- Two separate alarm relays (one changeover contact each)
- N/C or N/O operation and fault memory behaviour selectable
- Password protection for device setting
- Sealable transparent cover
- Two-module enclosure (36 mm)
- Push-wire terminal (two terminals per connection)
- RoHS compliant

Product description

The VME421H series voltage relays are designed to monitor the frequency, undervoltage, overvoltage and the voltage between two threshold values (window discriminator function) in AC and DC systems. The voltages are measured as r.m.s. values. The currently measured value is continuously shown on the LC display. The measured value required to trigger the alarm relay is stored. Due to adjustable response times, installation-specific characteristics, such as device-specific start-up procedures, short-time voltage fluctuations, etc. can be considered. The device is supplied with power by the system being monitored and utilises an internal energy backup.

Typical applications

- Voltage and frequency monitoring of single-phase machines and electrical installations
- Earth fault monitoring in medium-voltage systems via voltage transformers
- Monitoring of battery systems
- Switching machinery and equipment on and off at a certain voltage level

Function

Once the supply voltage is applied, the start-up delay “t” begins. Measured voltage and frequency values changing during this time do not influence the switching state of the alarm relays.

The devices feature two separately adjustable measuring channels (overvoltage/undervoltage). When the measuring quantity exceeds the response value (“Alarm 1”) or falls below the response value (“Alarm 2”), the time of the response delays “ton1/2” begins. Once the response delay has elapsed, the alarm relays switch and the alarm LEDs light up. When the measured value exceeds or falls below the release value (response value plus hysteresis) after the alarm relays have switched, the selected release delay “toref” begins. When “toref” has elapsed, the alarm relays switch back to their initial position. When the fault memory is activated, the alarm relays remain in alarm position until the reset button R is pressed.

Energy backup

Also in the event of complete power failure of the system being monitored, the delay times are effective during the energy backup time. When the fault memory is set to continuous mode, the alarm parameters remain stored, even on failure of the supply voltage.

Preset function

After connecting the device for the first time, the nominal system voltage will be determined (PrE run), and the response values for overvoltage and undervoltage as well as for underfrequency and overfrequency will automatically be set. When no voltage is determined within a nominal system voltage range (PrE run), the response values will be set to the minimum or maximum voltage. In this case, the message “AL not SET” appears on the display. As long as no button is pressed, a nominal system voltage is being searched cyclically (PrE run). If a button is pressed, the search will be interrupted and the message “AL not SET” disappears. In this case, the appropriate response values have to be set in the menu.

When activating the frequency monitoring function, the preset frequency will automatically be stored.
1 - Power On LED "ON" (green); lights when supply voltage is applied and flashes in the event of system fault alarm

2 - Alarm LED "AL1" (yellow), lights when the set response value \( U_{\text{f}} \text{ to } U \text{ or } f \text{ is exceeded and flashes in the event of system fault alarm.}

3 - Alarm LED "AL2" (yellow), lights when the value falls below the set response value \( U_{\text{f}} \text{ to } U \text{ or } f \text{ and flashes in the event of system fault alarm.}

4 - Multi-functional LC display

5 - Test button "T":
   Arrow up button: To change the measured value display, move upwards in the menu or to change parameters.
   To call up the self test: press the button "T" >1.5 s

6 - Reset button "R":
   Arrow down button: to change the measured value indication, move downwards in the menu or to change parameters
   To delete stored alarms: press the button "T" >1.5 s

7 - "MENU" button:
   Enter button: to confirm the measured value indication or to confirm changed parameters
   To call up the menu system, press the button "T" >1.5 s
   Press the ESC button >1.5 s to abort an action or to return to the previous menu level

1 - Connection to the system/load being monitored

2 - Alarm relay "K1": Configurable for \( U_{\text{f}} \text{ to } U \text{ or } f \) \text{ERROR}

3 - Alarm relay "K2": Configurable for \( U_{\text{f}} \text{ to } U \text{ or } f \) \text{ERROR}

4 - Line protection according to IEC 60364-4-43:
   A fuse recommended recommended. If being supplied from an IT system, both lines have to be protected by a fuse.
Timing diagram voltage monitoring

- `t`: Start-up delay
- `tan`: Response time
- `t_off`: Delay on release

Supply voltage

VME421H-D-1: Supply voltage U5 none (internally supplied by U6)

VME421H-D-2: Supply voltage U5 none (internally supplied by U6)

Power consumption ≤ 6 VA

Measuring circuit

Measuring range (r.m.s. value) (VME421H-D-1): AC/DC 0…150 V

Measuring range (r.m.s. value) (VME421H-D-2): AC/DC 0…300 V

Rated frequency fn

DC, 15 s…460 Hz

Frequency display range 10…500 Hz

Response values

VME421H-D-1:

Undervoltage < U (Alarm 2) AC/DC 9.6…150 V

Overvoltage > U (Alarm 1) AC/DC 9.6…150 V

Preset function:

Undervoltage < U (0.85 U9) for U9 = 120/60/24 V 102/51/20.4 V

Overvoltage > U (1.1 U9) for U9 = 120/60/24 V 132/66/26.4 V

Resolution of setting U 9.6…49.9 V 0.1 V

Resolution of setting U 50…150 V 1 V

VME421H-D-2:

Undervoltage < U (ALARM 2) AC/DC 70…300 V

Overvoltage > U (ALARM 1) AC/DC 70…300 V

Resolution of setting U 70…300 V 1 V

Preset function:

Undervoltage < U (0.85 U9) for U9 = 230/120 V 196/102 V

Overvoltage > U (1.1 U9) for U9 = 230/120 V 253/132 V

VME421H...:

Relative uncertainty voltage at 50/60 Hz 1.5 %, 2 digits

Relative uncertainty voltage in the range 15…460 Hz ± 3 %, ± 2 digit

Hysteresis U 1…2 % (5 %)*

Underfrequency < Hz 10…500 Hz**

Overfrequency > Hz 10…500 Hz**

Resolution of setting U 100…999 Hz 0.1 Hz

Resolution of setting U 1000…500 Hz 1 Hz

Preset function:

Underfrequency for fn = 400/60/50/16.7 Hz 399/59/49/15.7 Hz

Overfrequency for fn = 400/60/50/16.7 Hz 401/61/51/17.7 Hz

Hysteresis frequency Hz 0.1…2 Hz (0.2 Hz)*

Relative uncertainty, frequency in the range of 15…460 Hz ± 0.2 %, ± 1 digit

Time response

Start-up delay t 0…300 s (0 s)*

Response delay t1 = 0…300 s (0 s)*

Delay on release toff 0…300 s (0.5 s)*

Resolution of setting t, fn = 12, fn (0…10 s) 0.1 s

Resolution of setting t, fn = 12, fn (10…99 s) 1 s

Resolution of setting t, fn = 12, fn (100…300 s) 10 s

Operating time, voltage fse DC/AC 16.7 Hz ≤ 130 ms, AC 42…460 Hz ≤ 70 ms

Operating time frequency fse AC 15…460 Hz ≤ 310 ms

Response time fn fn = fse + t1 = 2 s

Discharging time energy backup on power failure (VME421H-D-1) 3 s

Discharging time energy backup on power failure (VME421H-D-2) 2.5 s at fn ≤ 42 Hz

Discharging time energy backup (VME421H-D-2) ≥ 4 s at AC 70 V

Charging time energy backup (VME421H-D-1) 60 s

Charging time energy backup (VME421H-D-2) 120 s

Recovery time t9 ≤ 300 ms

Displays, memory

Display LC display, multifunctional, not illuminated

Display range measured value (VME421H-D-1) AC/DC 0…150 V

Display range measured value (VME421H-D-2) AC/DC 0…300 V

Operating uncertainty at 50/60 Hz ± 1.5 %, ± 2 digits

Operating uncertainty in the range of 15…460 Hz ± 3 %, ± 2 digits

History memory (HiS) for the first alarm value data record measured values

Password off/0…999 (off)*

Fault memory (M) alarm relay on/off/con (on)*

Switching elements

Number 2 x 1 changeover contacts (K1, K2)

Operating principle N/C operation/N/O operation

Classification of climatic conditions acc. to IEC 60721:

Stationary use (IEC 60721-3-3) 3K5 (no condensation, no formation of ice)

Transport (IEC 60721-3-2) 2K3

Long-term storage (IEC 60721-3-1) 1K4

Classification of mechanical conditions acc. to IEC 60721:

Stationary use (IEC 60721-3-3) 3M4

Transport (IEC 60721-3-2) 2M2

Long-term storage (IEC 60721-3-1) 1M3

Connection

Connection type push-wire terminals

Connection properties

rigid 0.2…2.5 mm² (AWG 24…14)

flexible without ferrule 0.75…2.5 mm² (AWG 19…14)

flexible with ferrule 0.2…1.5 mm² (AWG 24…16)

Stripping length 10 mm

Opening force 50 N

Test opening, diameter 2.1 mm

Other

Operating mode continuous operation

Mounting any position

Degree of protection, internal components (DIN EN 60529) IP30

Degree of protection, terminals (DIN EN 60529) IP20

Enclosure material polycarbonate

Screw mounting 2 x M4 with mounting clip

DIN rail mounting acc. to IEC 60715

Flammability class UL94V-0

Documentation number D00141

Weight ≤ 240 g

(*) = factory setting

** = The technical data applies to the operating range of the rated frequency 15…460 Hz only.
